LANDOWNERS' DIRECTORY

OF NORTHEAST ILLINOIS

COMPRISING THE COUNTIES OF

BOONE, COOK, DE KALB, DUPAGE, GRUNDY, KANE, KANKAKEE, KENDALL, LAKE, PART OF LIVINGSTON, LA SALLE, McHENRY AND WILL

AS COMPILED FROM THE COUNTY ASSESSORS' RECORDS

EXCLUSIVE OF LANDS WITHIN THE CORPORATE LIMITS OF CITIES, TOWNS AND INCORPORATED VILLAGES

EXPLANATION

The present system of surveying and describing lands, called the rectangular system, was adopted by the Government May 7, 1875. All distances are measured from two sets of Principal Lines, intersecting at right angles. One set, the Principal Meridians, run north and south. The other, called Base Lines, run east and west. At intervals of every six miles east and west of the Principal Meridian and running parallel (i. e., north and south) with it, are established the Range Lines. The areas between these lines are numbered consecutively, Range 1 east, Range 2 east, or Range 1 west, Range 2 west, etc. At intervals of six miles north and south, the Base Line is also paralleled by lines running east and west. The areas between these lines are known as Township 1 north, Township 2 north, Township 1 south, Township 2 south, etc. The area of land enclosed by the intersection of the Township and Range Lines is six miles square and contains 36 square miles. This area is known as a Congressional township. The 36 squares in a Congressional Township are numbered from 1 to 36 and are called sections. A section is 1 mile square and contains, if properly laid out, 640 acres of land—a number easily divisible. Sections are most commonly subdivided into quarters by two lines intersecting each other at right angles in the center of the section. Other convenient subdivisions are also employed.

Almost every tract of land can be located by referring from the descriptions in the Directory to the county map. For the sake of convenience, the acreage of the farms appears in the column of figures preceding the name of the landowners, and the name of the owner is followed by the description of the property. The descriptions in the Directory, such as NE4 or NW4, SE4 or SW4, refer to the northeast quarter, the northwest quarter, the southeast quarter, or the southwest quarter respectively of the section stated. In a combination of symbols the first always expresses a fraction of the second. Thus, a description E2, NW4 would be the east half of the northwest quarter of a section. The symbol SE4, NW4 would be the southeast quarter of the northwest quarter of a section, and the acreage of such a description would be 40 acres; while the acreage of the E2, NW4 would be 80 acres. The figure below illustrates a few subdivisions of a section with descriptions and acreage:

Section.

	Description.	*Acres.*
(*a*)	W2	320
(*b*)	NE4	160
(*c*)	W2 SE4	80
(*d*)	NE4 SE4	40
(*e*)	N2 SE4 SE4	20
(*f*)	SW4 SE4 SE4	10

The names in the Directory are arranged geographically; that is, according to sections for each township. These townships, however, are the Political townships which, in their boundaries, do not always correspond with the Congressional townships, as it frequently occurs that a Political township includes all or part of one or more Congressional townships. Therefore, in order to avoid confusion, all real property is located and described by the township and range numbers of the Congressional townships. Where the boundaries of the Congressional and Political townships do not coincide the Township (T) and Range (R) numbers are given.

This Directory was compiled from the latest Assessors' Records of the various counties, corrections being made by the assessors of each township, with the exception of those townships marked thus (*). In some few cases it was impossible to secure mail addresses. Where no address is given, it may be safely assumed that the postoffice nearest the section in which the party lives is the proper place to which mail should be sent. By referring to the county map, the town nearest the section in question can be readily located.
